Experience

Senior Software Engineer - Averro, Inc | 08/2021 - Present

- Led consolidation of multiple frontend applications into a unified design system, establishing a scalable architecture and reducing duplication across the codebase
- Defined and implemented a centralized design token system (colors, theming) as a single source of truth across MUI and Tailwind, improving consistency and developer efficiency
- Reduced page load time by 2 seconds by eliminating synchronous data loading, significantly improving time to first paint and user experience
- Standardized engineering documentation practices across the team, improving onboarding, knowledge sharing, and cross-team alignment
- Built a secure certificate validation system for SSO authentication, verifying certificate chains against revocation lists

Full Stack Software Engineer - SuprTek | 02/2021 - 07/2021

- Mentored and pair-programmed with 3 junior developers to ensure code correctness, test coverage, and adherence to requirements
- Built a Java-based reporting system, including a custom Gradle task to aggregate JUnit XML results and enforce deploy-time pass/fail decisions.

Full Stack Engineer - CARFAX | 09/2019 - 09/2020

- Integrated internal services and third-party APIs into production applications, improving data reliability and feature delivery
- Implemented a weighted random lead distribution algorithm to fairly assign dealer leads based on prior lead volume

Web Application Developer - Veterans United | 11/2015 - 09/2019

- Led migration from a custom JavaScript framework to Angular, reducing development time and improving maintainability
- Built an online loan prequalification application that saved approximately 2.5 hours per loan officer, per application

Education

Associate of Applied Science, Computer Programming

Moberly Area Community College

Summary

Senior Software Engineer with 10+ years of experience building scalable SaaS and enterprise web applications using JavaScript, TypeScript, React, Angular, Node.js, C#, and SQL. Proven track record of improving application performance, reducing operations time, and mentoring engineers. Experienced in system design, reusable component architecture, and enterprise-scale development.

Skills

Frontend

JavaScript, TypeScript, React, Redux, HTML, CSS, Storybook

Backend

Node.js, C#, .NET, SQL, REST APIs, GraphQL

Testing & Quality

TestCafe, Cypress, Jest, Selenium
